

DENTAL HEALTH

February is Pet Dental Month

Schedule your pet's dentistry to be performed during the month of February and receive 10% off. Now that's something to smile about!

Did you know that dental health is a very important part of your pet's overall health, and dental problems can cause, or be caused by, other health problems? Your pet's teeth should be checked at least once a year by us for early signs of a problem and to keep your pet's mouth healthy. Call our hospital at 631-475-1312 to schedule now.

Although cavities are less common in pets than in people, they can have many of the same dental problems that people can develop: • broken teeth and roots • periodontal disease • abscesses or infected teeth • cysts or tumors in the mouth • malocclusion, or misalignment of the teeth and bite • broken (fractured) jaw • palate defects (such as cleft palate) • bad breath • broken or loose teeth • extra teeth or retained baby teeth • teeth that are discolored or covered in tartar • abnormal chewing, drooling, or dropping food from the mouth • reduced appetite or refusal to eat • pain in or around the mouth • bleeding from the mouth • swelling in the areas surrounding the mouth.

The best medicine is early treatment to prevent pain, tooth loss and expensive treatments. Call to Paumanok to schedule at 631-475-1312.
